**Maintenance Report - Astbury Water Technology**

Mr. Astbury recommended the board consider purchasing a spare pump for the influent lift station. Amy Moore, VS Engineering suggested purchasing a set of spare parts as a more cost-effective solution.

Dan Guard reported that the Comfort Drive lift station was only protected by a wooden fence with an unlocked gate. Mr. Astbury said his maintenance staff would get a lock for the fence / gate and install it immediately. Ms. Moore said she will check the lift station specifications to see whether the wooden fence is permanent or needs to be replaced.

Trevor Beers, Nucor Corp, came before the board to report that the site's expansion would require an increase in contractors and that they will be staged in the field near Nucor Road and Ladoga Road. The contractors' trailers will have temporary wastewater holding tanks. Mr. Beers asked for the board's guidance in how to handle the wastewater from the temporary holding tanks and if they can be pumped into the existing lift station.

Ms. Moore requested a site plan of the area. Mr. Astbury said that connecting more tanks to the lift station is preferable because it makes the treatment plant influent flow more consistent. Ms. Beregszazi agreed to coordinate a meeting with VS Engineering, Astbury Water Technologies, and Nucor Corp to create a specific wastewater management plan for the temporary contractor office trailers.

Brad Monts recommended reviewing the state's previous approval of Nucor's holding tanks because they might have placed a limit on the use of additional tanks on the site.
